

FOR IMMEDIATE RELEASE

Crescend Technologies Achieves ISO 9001:2000 Certification

SCHAUMBURG, Ill – December 19, 2005 - Crescend Technologies, L.L.C., has received ISO 9001:2000 certification for quality management practices. This achievement illustrates Crescend Technologies' commitment to exceeding customer expectations through continuously improving their processes and services.

Jim Hougo, president of Crescend Technologies, stated "Realizing that our amplifiers are a critical component to our Public Safety and radio customers, I am convinced that ISO 9001:2000 will help maintain and improve upon our quality standards."

The International Organization for Standardization (ISO) is a network of the national standards institutes of 156 countries. Published standards provide a common, worldwide set of consistent quality assurance guidelines. When a company is ISO certified, it is included in a list of registered manufacturers. Many firms use this list when they are selecting and qualifying suppliers that meet ISO 9001:2000 certification criteria.

About Crescend Technologies, LLC

Crescend Technologies is the largest independent land and mobile amplifier company, manufacturing for the UHF, VHF and 800/900 MHz markets. The company's products include rack-mounted amplifiers for 2-way radio and trunking, paging, and military applications, mobile amplifiers, and specialty application amplifiers.
